

# PlayCentral Terminal (PCT) 2012 Enhancements

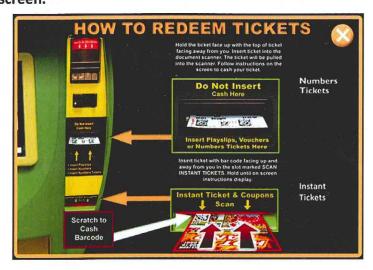

The Pennsylvania Lottery and Scientific Games have recently completed numerous PlayCentral Terminal (PCT) upgrades that were developed over the past year. Through focus groups and in-depth discussions with our retailer base, we are pleased to announce that we are continuing our efforts by enhancing the new "easy to use" sell screens, creating revised help screens and adding an instant coupon redemption feature.

### Single Use Coupon

Single Use Coupons provided by the Pennsylvania Lottery can now be redeemed at the PCT. Players select the REDEEM COUPON button, scan the coupon as they would an instant ticket, and follow the prompts on the screen.

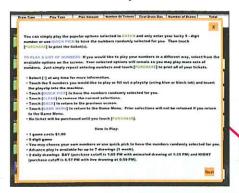

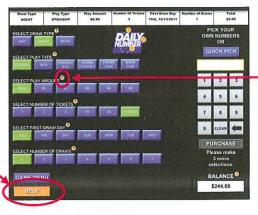

## Help Screens

Two different types of help text are now available. The main help button located at the bottom of each screen will provide assistance for all functions including game overviews. Contextual help presents a quick overview of specific actions required to make a purchase.

#### Main Help Screen

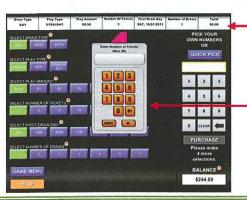

#### Contextual Help Screen

## TDN, BIG 4 and Quinto Games

In an effort to expedite the player's experience, the confirmation screens no longer display the TDN, BIG 4 and Quinto games. When the Player has a balance equal to or greater than the amount of their ticket selected, the ticket will automatically print when the PURCHASE button is selected.

Player's selections are progressively displayed at the top of each game menu screen.

Addition of the "OTHER" button (similar to the WAVE) under "SELECT NUMBER OF TICKETS" section allows players to choose a number not displayed on the screen.

## Powerball and Mega Millions

Powerball contains both "First Drawing Day" and "Number of Draws" options on one screen to streamline the player's experience. Mega Millions displays only "Number of Drawings" because skipping of draws is not allowed.
