10								54,801
Overall	3.18	2.07	3.71	2.49	1.89	2.92	2.20	1.79

Main Game Play Instructions:

Undersea Keno is a keno-style game. A single 10 x 8 game grid will appear on the game screen. To win a prize, the player must correctly match the SPOTS they have selected with the numbers drawn.

To begin a game, the player must clear the screen by either pressing the CLEAR button, or by pressing any of the SPOTS in the game grid. Once the game grid is cleared, the player must select the number of SPOTS to play and a PLAY AMOUNT.

The player may either select the SPOTS manually or use the QUICK PICK option. To select the SPOTS manually, the player must press 3 to 10 SPOTS in the game grid, numbered 1 through 80. To use the QUICK PICK option, the player must select the number of SPOTS using the button next to the QUICK PICK button, which will start with a default selection of 3 SPOTS. The player may cycle through the number of spots by pressing the SPOTS button. Once the player has selected the number of QUICK PICK SPOTS to play, the player must press the QUICK PICK button to select the SPOTS that will be played.

To select the PLAY AMOUNT, the player must press the button next to the PLAY AMOUNT. Once the player presses the button, the player may choose one of the options for the available game play purchase prices that are displayed.

After the player has selected the number of SPOTS to play and the PLAY AMOUNT, the player must press the PLAY button. When the game starts, the player will receive three, yellow, bonus spots, and then 20 numbers will be drawn. The player will receive a prize for correctly matching their selected SPOTS and the drawn numbers, based on the PRIZE TABLE next to the game grid.

The player has the option to toggle the TURBO switch to increase the speed of the number selection. Player selected SPOTS are indicated by a green fish. Drawn numbers are indicated by a red fish. Matches will be indicated with a pink star symbol.

The total amount the player wins displays at the end of the game play sequence and will appear in the TOTAL WON area at the top right of the game grid. The amount won will be added to the BALANCE area at the top left of the game grid.

FREE GAME Instructions:

The player wins a prize of ten FREE GAMES in addition to any other prize whenever three of the twenty numbers drawn match the three bonus numbers. Free games prizes are based on the number of SPOTS selected and the purchase price that was selected by the player when the FREE GAMES were awarded. FREE GAMES begin after the player presses the PLAY button and will play automatically.

Each FREE GAME begins with a wheel spin that awards the player one of the following prizes: (a) a prize multiplier of 1x, 2x, 3x, 4x, 5x, or 10x that is applied to any prize won in the FREE GAME draw phase, (b) thirty draws where thirty numbers are drawn in the draw phase of the FREE GAME instead of twenty, or (c)

an INSTANT WIN prize which results in the player winning 5x the purchase price and the current FREE GAME ends without a draw phase.

Additional FREE GAMES may be awarded during a FREE GAME sequence. A maximum of fifty FREE GAMES may be awarded in a single FREE GAME sequence.

Play Features:

UNDERSEA KENO has an AUTO PLAY feature. To use this feature the player must adjust the PLAY AMOUNT to the desired game play purchase price. Then the player must select the AUTO button to select the number of AUTO PLAY game plays. The player may select 5, 10, 15, or 20 AUTO PLAYs for the game session. To begin play, the player must select the PLAY button which displays the number of AUTO PLAY game plays selected.

To cancel AUTO PLAY before it starts, the player must press the AUTO button and choose OFF. To stop the AUTO PLAY feature once it has started, the player must select the PLAY button again at any time during the AUTO PLAY sequence. Once the button has been pressed, the AUTO PLAY feature will stop after the current game play has completed. The AUTO PLAY feature automatically stops following a FREE GAME sequence. The AUTO PLAY sequence automatically stops when a player wins a single prize greater than \$600 in any single game play.

If the player wins a single prize greater than \$600, the tablet and the card will lock, and no additional game plays may be purchased. The player must remove the card to unlock the tablet. The player must present the card to the participating retailer to unlock the card and complete a prize claim form to continue playing using the card.
